

Contents of hot rolling of IF steel

1. General and metallurgical aspect of IF steel
2. Hot rolling of IF steel
 - (1) High FDT operation
 - (2) High slab discharge temperature
 - (3) Scab problem due to slab surface defect
 - (4) Edge scab problem due to hot shortness
 - (5) Edge scab problem due to transformation to ferrite
 - (6) Rolled in scale (fish scale type scale) due to high FDT operation
 - (7) Rolled in scale (roll component scale) due to high FDT operation
 - (8) Width necking problem
 - (9) Other topics about IF steel production in hot strip mill
